PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable full-stack applications across healthcare, enterprise, and trading domains. Strong expertise in React, TypeScript, Node.js, FastAPI, and cloud-native delivery. Proven track record modernizing legacy systems, optimizing performance, building internal platforms, and delivering AI-powered products. Experienced in collaborating with cross-functional teams and driving engineering excellence.

EXPERIENCE

Software Developer - Individual Contributor | Ransky Tech | Jan 2026 - April 2026

- Engineered low-latency internal platforms for HFT workflows, enabling traders to analyze high-volume trade data in near real-time.
- Built real-time dashboards and analytics pipelines for PnL, execution quality, and trade performance visibility.
- Collaborated with trading teams to identify inefficiencies and automate analysis workflows, improving decision-making speed.
- Leveraged AI-assisted tools to accelerate development of analytics features and internal tooling.

Application Developer - Senior Consultant | Thoughtworks | Aug 2024 - Jan 2026

- Spearheaded an LLM-powered healthcare reporting platform (React, Express, FastAPI), improving reporting efficiency and reducing manual effort.
- Productized a clinical chatbot with Python, FastAPI, and PostgreSQL, enabling real-time responses and cutting turnaround time for clinicians.
- Designed and delivered a React-based admin panel, streamlining study/workflow management and boosting administrator efficiency.
- Mentored junior developers through code reviews and pair programming, elevating delivery standards and knowledge-sharing culture.
- Enhanced Bahmni open-source modules and release pipelines, ensuring reliable delivery for healthcare clients.

Application Developer - Consultant | Thoughtworks | Aug 2021 - Aug 2024

- Migrated legacy AngularJS codebase into modular Micro Frontends with React + TypeScript, increasing maintainability and reducing bugs.
- Built reusable component libraries that accelerated UI rollout across multiple product teams.
- Optimized backend APIs (Spring Boot, Node.js) reducing average response times under high-load conditions.
- Partnered with healthcare clients to scale Bahmni EMR deployments across hospitals, improving patient record accessibility.
- Engineered performance testing suite with Gatling and Grafana dashboards, identifying bottlenecks and improving API throughput.
- Standardized CI/CD pipelines (GitHub Actions, Docker, Kubernetes) across distributed repos, cutting deployment issues.
- Contributed to open-source communities (Bahmni, OpenMRS) through new feature builds and issue triaging.

Intern | EDITH Industries | Jan 2017 - Jun 2017

- Built and deployed a responsive React.js web app, improving client engagement and gaining hands-on experience with containerization and web frameworks.

SKILLS

Frontend: React, TypeScript, JavaScript, Redux, HTML5, CSS3, SASS

Backend: Node.js, Express.js, FastAPI, Spring Boot, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Cloud/DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, AWS

Testing: Cypress, Gatling, JProfiler

Architecture: Micro Frontends, CI/CD, TDD, Agile, System Design

EDUCATION

Bachelor of Technology - Honours | Jun 2017 - Jun 2021 | Computer Science and Engineering | NSS College of Engineering, Palakkad

Higher Secondary School | Jun 2015 - Jun 2017 | Computer Science | Chinmaya Vidyalaya, Vaduthala

PROJECTS

AI Chatbot for Healthcare Admin Panel – Extended a medical admin panel with chatbot integration using FastAPI + Temporal Workflows, enabling real-time DB responses.

Report Generation with LLM – Built a React.js + Express.js web app to generate drug/medicine reports via LLMs with dynamic content creation.

Bahmni Product Maintenance – Long-term open-source contribution; implemented new features, improved in-patient journeys, and coordinated community-driven releases.

EMS Code Migration – Upgraded an Angular 1.x legacy EMR codebase to a React-based MFE system, enhancing UX, performance, and modularity.

Contact Keeper – Full-stack contact organizer with REST APIs; explored UI/UX mockups using Figma.

CERTIFICATIONS

Meta Front-End Developer | Aug 2024 - Sept 2024

Non-credit Professional Course with 9 custom programs - HTML and CSS in Depth | Version Control | Programming with Javascript | Introduction to Frontend Development | React Basics | Advanced React | Frontend Developer Capstone | Coding Interview Preparation | Principles Of UI/UX Design
