PROFESSIONAL SUMMARY

Frontend-focused Full Stack Engineer with 4+ years building scalable products across fintech and healthcare. Expertise in React, TypeScript, JavaScript, and modern UI architecture with strong backend/API collaboration experience.

EXPERIENCE

Software Developer Individual Contributor

Ransky Tech Jan 2026 Apr 2026

Built internal web applications for trading users to monitor transactions, ledgers, balances, and profitability across multiple exchanges.

Developed React-based dashboards and reporting interfaces to simplify complex financial data into actionable insights.

Integrated multiple third-party exchange APIs and normalized heterogeneous data into a unified internal model.

Built Python/JavaScript backend services for automated report generation and scheduled workflows, reducing manual reconciliation effort.

Applied secure coding practices to protect sensitive financial data across all exchange integrations and user-facing interfaces.

Application Developer Senior Consultant

Thoughtworks Aug 2024 Jan 2026

Spearheaded an LLM-powered healthcare reporting platform (React, Express, FastAPI), improving reporting efficiency and reducing manual effort.

Productized a clinical chatbot with Python, FastAPI, and PostgreSQL, enabling real-time responses and cutting turnaround time for clinicians.

Designed and delivered a React-based admin panel, streamlining study/workflow management and boosting administrator efficiency.

Mentored junior developers through code reviews and pair programming, elevating delivery standards and knowledge-sharing culture.

Application Developer Consultant

Thoughtworks Aug 2021 Aug 2024

Migrated a legacy AngularJS platform into modular React + TypeScript Micro Frontends, improving maintainability and user experience.

Built reusable component libraries that accelerated UI delivery across multiple teams.

Optimized frontend bundles, rendering performance, and load times using modern build tooling and code-splitting practices.

Collaborated with backend engineers to define API contracts and integrated frontend applications with REST APIs and enterprise backend services.

SKILLS

Frontend React, TypeScript, JavaScript (ES6), Redux, HTML5, CSS3, SASS

Backend Node.js, Express.js, Python, FastAPI, REST APIs

AI / LLM LLM application development, Prompt Engineering

Databases PostgreSQL, MySQL, MongoDB

Build Tools Webpack, npm, Yarn, Code Splitting

Testing Cypress, Jest

DevOps Docker, Kubernetes, GitHub Actions

Practices Performance Optimization, Agile/Scrum, CI/CD

EDUCATION

B.Tech (Hons) Computer Science
NSS College of Engineering, Palakkad
Jun 2017 Jun 2021

Higher Secondary Computer Science
Chinmaya Vidyalaya, Vaduthala
Jun 2015 Jun 2017

PROJECTS

Financial Reporting Platform

Cross-exchange platform to track balances, P&L, fees with automated daily reporting.

AI Chatbot for Healthcare

Medical admin chatbot via FastAPI + Temporal Workflows for real-time DB responses.

EMS Code Migration

Migrated Angular 1.x EMR to React MFE, improving UX, performance, and modularity.

Bahmni Product Maintenance

Open-source contributions; new features, in-patient journey improvements, release coordination.

CERTIFICATIONS

[Meta Front-End Developer](#) Sep 2024

9-course certification: HTML/CSS, JavaScript, React, Advanced React, UI/UX Design, Version Control, Frontend Capstone.
